CAREER SUMMARY

Ruby on Rails developer with 5 years of experience in Requirements Analysis, Design, Development, Implementation, Production using Ruby on Rails, Hotwire, StimulusReflex, ReactJs, React Native and other Web Aplication frameworks.
Experience in Agile Development, Git Hub, Amazon EC2, Amazon AWS and Heroku.
Experience with Test Driven Development using Rspec, Cucumber, Jest.

WORK EXPERIENCE

Ruby On Rails Developer - Remote   Remote Work
March 2021 - Present

Designing and developing highly distributed Ruby on Rails web applications for high performance, high traffic, advanced interactive site that attracts over 1 million unique visitors per day, by providing online real estate and neighborhood information to consumers and professionals.

Achievements:

- Proactively suggested architecture changes and new coding practices through GitHub management that reduced application and functionality errors by 30 %.
- Implemented a new collaboration tool that improved offshore team communications efficiency by 36 percent.

Technologies used:

`Ruby` `Ruby on Rails` `PostrgreSQL` `Webpack` `REST API` `SASS`

Ruby On Rails Developer   KIPS
2017 -2021

Involved in developing and implementation of the back-end web application using ruby and rails and rake files. Used Restful API to gather sales related data for products. Used Cloudinary for improved eciency of storage and fast access. Developed BDD tests using Cucumber and Capybara by writing behaviors and step denitions.
Developed client side validation code using Javascript, Javascript libraries and React JS.

Achievements

Helped influence design and architecture, improving development processes, and driving direction of the product.

Technologies used:

`Ruby` `Ruby on Rails` `SQL` `PostrgreSQL` `jQuery` `REST API` `GraphQL`

Junior React JS & Ruby on Rails Developer   Pi Solution
2015 - 2017

Daily maintenance of websites, including debugging issues and performing speed tests. Since the beginning I worked managing the projects, I talked with the clients, understand what they wanted, and build the right solution for it.

Technologies used:

`React JS` `JavaScript` `REST API` `Ruby on Rails` `HTML/SASS`

PC Repair Technician   Local
2012- 2015

Maintaining computer systems, troubleshooting errors, maintaining internet connectivity, running diagnostic tests, maintaining servers, repairing computer hardware, and providing technical support.

SKILLS & TOOLS

Backend

Ruby

Ruby on Rails

SQL, MongoDB, Neo4j

Sidekiq, Redis

REST API, GraphQL

AWS, Google Cloud

Frontend

JavaScript

React JS, React Native

Hotwire, StimulusReflex

SASS/LESS/Bootstrap/Tailwind

JSON

Others

`Docker` `Git` `Unit Testing` `UI / UX` `Leader` `Dev Tools`

EDUCATION

Full Stack Web Development Program, Full Time
</> Microverse, San Francisco
2020 - 2022

BSc Maths and Physics
🏛 University of Sarajevo, Faculty of Mathematics
2007 - 2012

Link to certificates

LANGUAGE

English (Professional)

Serbian (Native)

PROJECTS

📷 Bank

🍽 Restaurants

🏢 Mayo Clinic
